Time	October 2011– April 2012
Description of the Project	<p>The schools will work together on the topic "noise".</p> <p>The project concerns the problem of noise at school, how it influences students way of study and health.</p> <p>We want to make students aware of the problem and take care of making the school a nice place of study and playtime without screaming and shouting. Children will find out advantages of quiet playtime. After sharing and comparing the results of various activities children will try to develop healthier behaviour.</p>
Objectives	<p>The project aims at educating students in the area of noise, how it influences our health. Due to different school activities we want to focus on students good study conditions and reduce the level of noise at school. The project is also to increase the ability to research and use new technologies; to work together with pupils and teachers of different European countries; and to improve the knowledge of the English.</p>
